European Certification & Qualification Association

European Certification and Qualification Association (ECQA) is an umbrella for the training and examination organizations. It gathers professionals in job role committees and issues the certificates. ECQA provides a common framework of rules, processes and structures for new management courses, professions and competencies. It ensures cooperation at regional, national and transnational level.

The purpose of LeadSUS training program is to acquire new management competencies, which will support sustainability leadership within organizations. This is achieved through a unified ECQA compliant course, exam and the certification, which is valid all over Europe.

Project objectives

The general objective of the project is to transfer and integrate sustainability leadership skills to European industry and institutions.

Specific objectives

1. Adaptation, harmonization and refinement of existing training material and its integration into a professional training program dedicated to employees of companies, institutions and VET organizations
2. Achievement of EU Certification of the new training program and job role as Sustainability Manager within the ECQA frame work.
3. Creation of E-learning platform within the ECQA framework to facilitate the on-line training on sustainability management for different trainees from different EU locations
4. Extension of Capability Adviser - Process Management Software Tool to support Sustainability Management assessment process.
5. Testing/piloting the training program in Romania and France
6. Building the capacity in Sustainability Management topic in Romania, Slovenia and France by training future trainers (15 persons) and future Sustainability Managers (110 persons)

Project overview

The project aims to support organizational leaders and employees, to understand the strategic implications of sustainability by developing innovative and creative approaches.

The training will drive leadership understanding, strategic business approaches, enthusiasm, innovation and consideration of environment and social aspects as key issues toward sustainable development.

The project target groups are managers and employees, representatives of private organizations (industry related) and public organizations, with environmental, social or business development related responsibilities and employed master students.

During the project lifetime, future Sustainability Managers will develop competences and skills on the following topics:

- Sustainability management,
- Economic sustainability,
- Ecologic sustainability,
- Social sustainability,
- Product and service sustainability.

All participating trainees will have the opportunity to certify their newly acquired skills and competences within ECQA (European Certification and Qualification Association) framework, on two performance levels: foundation or advanced.

The future training platform will be available on www.ecqa.org

Registration process

Your journey of becoming one of the ECQA certified Sustainability Managers starts with the registration process.

This process has to comply with related European funded projects legal requirements but also with our project specific requirements for the target group.

The process is facilitated by our on-line registration tool available at: www.leadsus.eu

You should know that we are requiring the following kind of information:

1. Name and surname
2. Name of the organization you are working for
3. Your employment position
4. Your contact details
5. Your preferences regarding training method you want to follow (on-line or in-class)
6. Your preferences regarding the performance level you want to achieve (foundation or advanced)

Please be aware that by registering for the participation in the project we are expecting your commitment to allocate sufficient time and effort for the training and learning activities we are preparing for you.

For any other information and details regarding your registration please contact us at:

office@denkstatt.ro - for Romania

peggy.zwolinski@g-scop.inpg.fr - for France

tomislav.rozman@bicero.com - for Slovenia
